pages 1-12, as originally filed  
pages NONE, filed with the demand  
pages NONE, filed with the letter of \_\_\_\_\_
- ☒ the claims:  
pages NONE, as originally filed  
pages NONE, as amended (together with any statement) under Article 19  
pages NONE, filed with the demand  
pages 13-15, filed with the letter of 14/10/2004
- ☒ the drawings:  
pages 1-9, as originally filed  
pages NONE, filed with the demand  
pages NONE, filed with the letter of \_\_\_\_\_
- ☒ the sequence listing part of the description:  
pages NONE, as originally filed  
pages NONE, filed with the demand  
pages NONE, filed with the letter of \_\_\_\_\_

## 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language English which is

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).

- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

## 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☒ The amendments have resulted in the cancellation of:

- ☐ the description, pages \_\_\_\_\_
- ☒ the claims, Nos. 2
- ☐ the drawings, sheet \_\_\_\_\_

## 5.

- ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).\*\*

\* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this opinion as "originally filed." and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

\*\* Any replacement sheet containing such amendments must be referred to under item I and annexed to this report.

## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	<u>1, 3-11</u>	YES
	Claims	<u>NONE</u>	NO
Inventive step (IS)	Claims	<u>1, 3-11</u>	YES
	Claims	<u>NONE</u>	NO
Industrial applicability (IA)	Claims	<u>1, 3-11</u>	YES
	Claims	<u>NONE</u>	NO

### 2. Citations and explanations (Rule 70.7)

Claim 1 has been amended, claim 2 has been cancelled, and claims 3 to 11 have been amended. The scope of these claims has not been extended beyond the disclosure of the patent application as filed.

Reference is made to the following document:

D1: KR 285242 Y1 (Choi, Yoon-Cha)

The present invention relates to a footwear insole comprising an insole body and a load-applying part installed on a rear portion of the insole body in order to increase the weight of the footwear. The load-applying part comprises an insert member formed of a heavy weight material and a receiving part formed of an elastic material, for said insert member, which is designed to be removably attachable to the insole body.

Document D1, which is considered to represent the most relevant state of the art, discloses sports shoes for enhancing physical strength having their sole divided into the upper and middle layer and a bottom sole, including: two high-elastic sponges adhered to the top surface of the middle layer thereof; a plurality of holes widely distributed in both the upper sole and two elastic sponges; a certain space formed inside of the middle layer; and PVC pipes and/or metal tubes engaged with given intervals in the above space.

In some remarks submitted by the applicant on 14/10/2004, the present invention is found to satisfy the requirements of Article 33(2) and (3) PCT in view of novelty and inventive step.

The subject matter of the present invention as defined by claims 1 and 3-11 differs from that of D1 since an insole is designed detachable and is formed of an elastic material capable of absorbing impact applied to the insert member. So, these technical feature of the present invention are not easily conceivable by even an ordinary skilled person in the art.

Therefore, the subject matter of claims 1 and 3-11 is considered to be novel, to involve an inventive step and to be industrially applicable.
